Name:______________

What practices do scientists and engineers follow?

Directions: Read the article or listen to the interview provided to you by your teacher, and with your partner respond to the following

1. Are you learning about a scientist or an engineer? ________________

2. What specific type of scientist or engineer are they? ________________

3. Read the article or listen to the interview provided to you and your partner.

4. Summarize in your own words what that type of scientist studies:

5. Together you and your partner should determine key practices that a person in that profession does, list them in the correct box below. Once your teacher partners you with another group, fill in the second half of the chart.
